## STORMTECH® nurtured by nature

## **STORMTECH®**

## nurtured by nature

Inspired by the rugged landscapes of the Pacific Northwest and refined in Vancouver's cool, urban cityscape, STORMTECH Performance Apparel has outfitted explorers and seekers for extreme, unpredictable weather and conditions since 1977. Fueled by our passion for the outdoors, we build durable, functional, contemporary clothing and deliver quality and innovation year after year.

At STORMTECH, we believe in environmental stewardship, with technologies that lessen our impact on our natural environment. STORMTECH creates timeless, high-quality products designed to extend product life and minimize environmental impact. We back up our commitment to quality workmanship with a 5 year warranty, and have built out a sustainable product care program to extend product life and performance.

Sustainable practices are ever evolving, and we are committed to minimizing our environmental impact and enhancing sustainable practices through responsible design, sourcing, and daily business operations. We also support youth through our 1:1 initiative, and support worker health and safety at all of our factories and office locations.

STORMTECH Performance Apparel incorporates proprietary fabric technologies, including H2XTREME® and H2X-DRY® with smart sourcing and manufacturing processes including PFC-Free water repellent, leak-proof, heat-welded seams and precision, laser-cut and bonded plackets.

STORMTECH is a one-stop, full-service partner uniquely structured for the corporate marketplace, offering a comprehensive array of in-house decoration services, a robust e-commerce website and a highly-skilled customer service team to support and fulfill your orders.

Visit us online or connect on social media.

## **Brand in Action**

STORMTECH is thrilled to announce our latest brand ambassador partnership with Pacific Discovery. Together the team of four will be the first Reinsurance team to row the Pacific Ocean. With a mission to raise awareness for mental health and the stigma around mental health issues, Cameron, Tia, Celo and Stuart have committed to spending the next 10 months preparing themselves, both physically and mentally, for this monumental test. STORMTECH is proud to be a part of this journey providing the team with our high performance collection designed to protect in even the harshest weather conditions. Come rain or shine - we've got their back!

The challenge begins June 2023 and takes a whopping 40 days to complete the 4,500 km stretch across the Pacific.

## STORMTECH® RACING

STORMTECH is the proud sponsor of Melodie Schaffer and Ryan Barkey, the first co-ed team to ever compete in their class of the Transat Jacques Vabre. The Transat Jacque Vabre is one of the most prestigious offshore racing circuits on the global scene. The Canadian duo were one of 45 crews battling in the Class 40 double handed, and took over 20 days to complete the 4,600 mile (8,500 km) course from Le Havre, France to Martinique.

## Pacific Discovery

Rowing the pacific is not just about the challenge, it's about the daily commitment towards testing our mental and physical endurance. Putting ourselves into extreme conditions, we have to trust ourselves and our team to show up every single day. Being able to physically face the adversity of an ocean comes through feeling empowered in your own skin. In STORMTECH we've found a partner who understands what it means to show up and perform in some of the most difficult conditions.

That's why we're incredibly honoured to have such a great brand by our side throughout this adventure - and beyond.

We know they've got us covered, through any storm.

## Social Responsibility

STORMTECH's Corporate Social Responsibility focuses on responsible sourcing practices, product safety, environmental stewardship, and giving back to local community organizations.

#### ENVIRONMENTAL STEWARDSHIP

STORMTECH is committed to reducing the environmental impact of our operations. We encourage our business partners to comply with all applicable environmental laws and regulations in the country of operation and encourage our whole supply chain to reduce the use of natural resources, to reuse where feasible, and to recycle whenever is possible.

#### PRODUCT QUALITY ASSURANCE

At STORMTECH, we take pride in ensuring our products are tested and inspected at the highest level of performance.

Our products are tested through third party accredited testing laboratories according to the American Association of Textile Chemists and Colourists (AATCC), American Society for Testing and Materials (ASTM), and the American Apparel & Footwear Association (AAFA).

#### **PRODUCT SAFET**

At STORMTECH we maintain a stringent Restricted Substances List (RSL) based on global standards and laws, and a corresponding testing protocol that ensures our products meet these standards. The RSL protocol is following various substance restricting laws and regulations such as Canadian Consumer Product Safety Act (CCPSA), Consumer Product Safety Improvement Act (CPSIA), Federal Hazardous Substances Act (FHSA), California's Proposition 65, AAFA Restricted Substance List (RSL), Registration/ Evaluation, Authorization and Restriction of Chemicals imported into the European Union( REACH).

#### 100% PFC-FREE

As an outdoor clothing brand that believes we're at our best in nature, STORMTECH is committed to sustainability and protecting the natural environment.

We have partnered with fabric mills and garment factories to find alternative, breathable water repellent treatments that are PFC-Free without sacrificing the performance of our materials.

Together with our suppliers, we have selected the best fluorocarbon-free technologies that have proven reliable on our materials.

#### **CHARITABLE GIVING**

We are committing 1% of our total global sales to charitable initiatives focused on outdoor exploration and environmental stewardship. That means every STORMTECH purchase further empowers our partner organizations to make the world a better place. Through the Nurtured by Nature Initiative, we share our passion for outdoor experiences by donating our premium gear to organizations that cultivate a love, respect, and passion for the outdoors.

The Pure Earth Project provides gear and funds to organizations committed to environmental change.

#### RESPONSIBLE SOURCING PRACTICES

STORMTECH is firmly committed to selling products that are manufactured under legal, safe and fair working conditions in factories where employees are treated fairly.

Our Ethical Sourcing Policy is designed to ensure that our global sourcing supply chain operates in compliance to STORMTECH's requirements and all applicable laws governing child labor, forced labor, wages, benefits, working hours, harassment, health and exfert

health and safety & factory security.

# SUSTAINABILITY

We're on a mission to make clothing sustainable through product design, sourcing, and compliance. STORMTECH's Pure Earth collection is made using content from Recycled Polyester (RPET) and certified BCI Cotton. By turning discarded plastics into polyester and committing to sustainably sourced cotton, STORMTECH is reducing the waste and environmental impact associated with apparel production.

#### CERTIFIED BCI COTTON

• The Better Cotton Initiative (BCI) aims to make cotton production more sustainable.

 BCI Cotton promotes better working conditions for farmers and farm workers.

 Through BCI and its Partners, farmers receive training on how to use water efficiently, care for the health of the soil and natural habitats, and reduce use of the most harmful chemicals.

ZeroImpact

#### **RECYCLED POLYESTER**

 The Pure Earth Collection uses Polyester regenerated from PET plastic found in landfills and oceans.

 These new sustainable products give materials a second life.

As climate concerns continue to grow, sourcing recycled fibers will lower the carbon footprint of STORMTECH products.

Sustainably Sourced Recycled Polyester

## Sustainable Design and

### SUSTAINABLE SOURCING PRACTICES

Sustainable practices are ever evolving. We are committed to minimizing our environmental impact and enhancing sustainable practices through responsible design, sourcing, and daily business operations.

#### 1. PRODUCT BUILT TO LAST

STORMTECH creates timeless, high-quality products designed to extend product life and minimize environmental impact. We back up our commitment to quality workmanship with a 5 year warranty, and have built out a sustainable product care program to extend product life and performance.

#### 2. RESPONSIBLE SOURCING

Sustainable sourcing is STORMTECH's key priority. Our supply chain is built on strong, transparent, and trusted business partnerships, focused on transparency, traceability, and zero waste at all stages. We work with compliance-certified mills, factories and supply partners, ensuring the sustainability of both social and environmental practices.

#### **3. INCREASED USE OF RECYCLED CONTENT**

We seek out recycled content in our daily business operations and are introducing recycled content into new product developments. Exclusive material technologies and recycled polyester will feature prominently in future seasons.

#### 4. PROTECTING OUR OCEAN

STORMTECH is working towards zero impact from fiber fragmentation from textiles to the natural environment by 2030 and to reduce the amount of microfibers and microplastics contributing to water pollution. Stronger, more durable polyester fleece MICROFIBER INITIATIVE standards can significantly reduce the amount microfiber fragmentation in accordance with the FibeRdex<sup>®</sup>.

STORMTECH is committed to the Forest Stewardship Council (FSC) of sustainable sourcing of wood-based fibers, cellulosic fabrics, and paper products in a way that addresses the major environmental impacts associated with deforestation and forest degradation. All hang tags, cartons, and packaging are sourced from Forest Stewardship Council (FSC) certified forest, recycled content, or other controlled wood sources.

#### 6. PRIORITIZING ANIMAL WELFARE

All STORMTECH products are feather-free and fur-free. Our Animal Derived Materials policy further outlines the restrictions on use of materials sourced from endangered animal habitats. Our guiding principles are the five freedoms of animal welfare as underlined by the World Organization for Animal Health https://www.oie.int/animal-welfare/

#### 7. INCREASED USE OF BIODEGRADABLE MATERIALS

Starting with Spring 2022 new styles, all our products are packed in sustainable materials including Oxobiodegradable bags and FSC<sup>®</sup> certified cartons.

#### **PROTECTING OUR FORESTS**

### SUSTAINABLE PRODUCT CARE

STORMTECH is committed to educating consumers on Product Care Sustainability by explaining some simple ways to prolong the lifespan of our garments, while protecting the environment at the same time. Product care contributes to 25 percent of a garment's carbon footprint through washing, drying, ironing, and dry cleaning. By following the below product care instructions, you will help extend the lifespan of your STORMTECH garments while minimizing your carbon footprint.

#### H2XTREME® PRODUCT CARE INSTRUCTIONS

- Routine product care and maintenance ensures the optimum performance of your H2XTREME® garments.
- Zip up all zippers and hook-and-loop closures to prevent snags.
- Read the care label for specific washing/drying instructions.
- According to best practices for most waterproof/breathable outerwear, it is recommended to wash according to the following usage:
  - Light activity (casual, walking): Wash after 20 to 30 days of use
  - Heavy activity (skiing, running, hiking): Wash after 10 to 15 days of use

#### H2X DRY® PRODUCT CARE INSTRUCTIONS

- Read the care label for specific washing/drying instruction details.
- Zip up all zippers and hook-and-loop closures to prevent snags.
- Wash inside-out with cold water on the gentle, low spin cycle with like colours.
- Use mild detergent, preferably non-toxic and biodegradable.
- Do not bleach. Do not dry clean.
- Do not add fabric softener, these chemicals are harmful for the environment and can degrade overall durability.
- Air dry or tumble dry on low heat. High heat can reduce the H2X-DRY performance and contribute to static cling.
- If needed, iron on a cool setting to avoid damaging logos or material that comes in contact with high heat.

For more information on product care and washing instructions, visit www.stormtechperformance.com

#### HOW TO REDUCE THE ENVIRONMENTAL IMPACT OF LAUNDRY

- Reduce washing frequency
- Use biodegradable, non-toxic detergent

- Use cold water wash
- Hang to dry when possible
- Use steam instead of ironing

STORMTECH H2XTREME CARE GUIDE

## **TECHNOLOGY ICONS**

SEAM-SEAL

CLIMATE

RANGE

With a heritage of 45 years outfitting adventurers for extreme weather and conditions, innovation is at the core of STORMTECH's culture and values. Our durable, functional, contemporary clothing is built using advanced fabric technologies, and smart sourcing and manufacturing.

To help our customer easily identify the benefits of our high-performance gear, we've developed a collection of 8 technology icons.

### WATERPROOF

Keeps outside moisture from penetrating the fabric. The waterproof rating is typically expressed in milliliters (1,000mm to 10,000mm) based on water pressure tolerance over a 24-hour period. Generally, the higher the rating, the higher the waterproof protection.

BASIC | LEVEL 1 600mm to 2,000mm HIGH | LEVEL 2 2,000mm to 8,000mm EXTREME | LEVEL 3 8,000mm to 15,000mm+

#### BREATHABLE

The movement of air from one side of the fabric to the other to keep the wearer comfortable. The breathability rating is typically expressed in a gram measurement of how much vapor a square meter (G/M2) of fabric will allow to pass in a 24-hour period (typically, 1,000G/M2 to 10,000G/M2) the higher the number, the more breathable the garment.

**BASIC | LEVEL 1** 1,000g/m<sup>2</sup> to 5,000g/m<sup>2</sup> HIGH | LEVEL 2 5,000g/m<sup>2</sup> to 5,000g/m<sup>2</sup>

EXTREME | LEVEL 3 15,000g/m<sup>2</sup>+

#### CLIMATE RANGE

A system developed by STORMTECH by taking several factors into consideration such as activity level, wind chill, sun exposure etc. An useful guide for selecting the appropriate garment for your adventure.

MILD +20°C (68°F) to +5°C (41°F) **COLD** +5°C (41°F) to -10°C (14°F) EXTREME COLD -10°C (14°F) to -30°C (-22°F)

#### FULL SEAM-SEAL

Seam sealing is the application of a specialized waterproof film used to seal seams. Because sewing needles create small holes that will cause the fabric to leak, seam-sealing is used to seal the holes, to make the seam waterproof. Fully seam-sealed indicates that all seams are sealed, to make a watertight outer membrane.

#### ULTRASONIC WELDED SEAMS

Ultrasonic welded seams make a watertight seam using mechanical vibrations above the audible range to 'weld' fabric panels together, without any needle punctures from sewing. Ultrasonic seam welding is an advanced manufacturing process and makes an absolute leakproof seam.

#### CRITICAL SEAM-SEAL

The critical seam seal icon indicates that the seams and junctions most vulnerable to leak under normal conditions - typically the seams on the neck, shoulders, and chest – are sealed. In this case, not all seams are sealed. Critical seam sealing is a suitable technology for most outdoor activities, but full seam sealing is best for extreme weather.

#### DEVICE SIZE

The maximum device size icon indicates the maximum size device that the product device pocket or compartment will accommodate.

#### RFID BLOCK

RFID block materials effectively block radiofrequency. Chip-enabled cards like credit cards and identification cards can be wirelessly 'skimmed' to collect your personal data. RFID block technology protects from electronic pickpocketing, and wireless theft.

## STORMTECH® FABRIC TECHNOLOGY

#### TECHNICAL CLIMATOLOGY

Ultimate weather protection through advanced waterproof/ breathable technology perfected to keep moisture at bay, inside and out.

## Were and Out Ut the HZTREME Membrane

#### WATERPROOF. BREATHABLE.

#### PFC-FREE DWR WATER RESISTANC

The PFC-Free DWR (Durable Water Repellent) technology is a polymer coating added to outerwear to provide waterresistant protection. DWR treated fabrics prevent light rain and snow precipitation from saturating the outer fabric surface and prevents fabric from becoming weighed down by excess moisture, leaving the wearer to enjoy comfort and optimized comfort and freedom of movement.

#### ACTIVE MOISTUR MANAGEMENT

Next-to-skin climate control with moisture management technology to regulate your core.

## MOISTURE MANAGEMENT

#### ODOR CONTROL

Polygiene® makes your products stay fresh, which means that you can enjoy fresh-all-day confidence, as well as wear your products more and wash them less. Saving you time, water and waste – and not least, the product itself.

#### LIGHTWEIGHT ELEMENTAL DEFENSE

Highly efficient and highly compressible synthetic down alternative—maximum warmth in extreme cold.

## FEATHERFREE

#### SUN PROTECTION

STORMTECH UPF Protective products are designed with engineered fabrics to provide sun protection to the wearer as well as extra comfort and coolness.

## **Technical Outerwear**

Born in the rugged west coast rainforests of British Columbia, Canada, STORMTECH's designs are inspired through the lessons learned from the rain, snow, and sun. We pay painstaking attention to mother nature's varying moods in order to develop the very best in technical outerwear. With design excellence and functionality that blends exclusive technologies, such as H2XTREME®, we build hard-wearing garments that provide maximum protection and comfort so you can get out there and explore with confidence.

## Three-in-One Interchangeable System Jackets

The original, since 1983. When heading outdoors you can predict and plan a full day of outdoor activity with certainty, but what you can't predict is what the weather will hold. Enter our 3-in-1 system jackets; your versatile answer to the unpredictable. These system jackets are 3 jackets in 1, pairing a weatherproof outer shell with a removable, ultrawarm insulated inner jacket. This allows you to customize your jacket when the weather is playing the fickle fiddle. STORMTECH 3-in-1 system jackets have been developed for a wide range of outdoor environments, for both work and play.

GRID BACK FLEECE LINING Offers superior thermal properties while allowing for airflow and breathability

> DUAL CHEST POCKETS Protect your valuables safely and securely with easy access

ZIP-OUT INSULATED LINER For versatility of wear, whatever the season

## FAIRBANKS 5-IN-1 SYSTEM JACKET

PXR-2 | PXR-2W

Intemperate weather just met its match. The Fairbanks 5-in-1 System Jacket can be worn in 5 different configurations that adjust to changing weather conditions. This winter parka converts to a rainshell by removing the thermal liner, which can also be worn as a thermal shell or vest. The snap-off adjustable hood allows added inclement weather protection. It's a lightweight design with heavyweight resistance in moderate to extreme conditions. Smart design dual hand pockets offer plentiful space for your valuables.

STORMTECH HD Nylon Taslon Out Shell Heavy-duty, highly-durable, nylon taslon fabric is constructed to withstand the most rigorous and extreme applications and industries

# Rainshells

Whether it's a gentle patter or a full-on deluge, rain evokes action. Sometimes we dance in it, sometimes we run from it, and sometimes we play in the puddles left behind. Whatever you decide, we have you covered with our extensive technical and urban aesthetic rainwear collection. After all, located in the heart of the rainy coastal mountains of British Columbia, STORMTECH does know a thing or two about what to wear in the rain.

# Fleece & Layering

It's fair to say that warm and fuzzy feelings are an unavoidable side effect of being surrounded by clear lakes and majestic snowcapped peaks. STORMTECH has drawn inspiration from those feelings and created tactile equivalents by using only the finest soft, synthetic materials and cotton in the manufacturing of all our fleece and layering styles. This has earned us 'best in fleece' status. Our collection consists of an array of base and mid layers that are lightweight, functional and perfect for a warm layer or light sweater. So layer up and feel the joy.

# AVALANCHE FULL ZIP FLEECE JACKET

Just because you head out in extreme weather, doesn't mean you need to invite it in. The Rainier 25 Waterproof Backpack protects your laptop and other valuables by sealing out the wet with ultrasonically welded seams, waterproof zipper, and a roll-top closure. Proven tough, this pack can be trusted from bucketing backcountry adventure to pouring city commutes. With ergonomic, adjustable shoulder and sternum straps as well as a padded airflow back panel, this pack has your back in the comfort department.

# **INSPIRED DECORATING TECHNIQUES**

At STORMTECH we offer a comprehensive array of in-house decoration techniques to present your brand artwork on our premium apparel, bags, and accessories. We meticulously test each decoration technique on every product to ensure we recommend the most suitable method for each individual product.

Our team of decoration experts are happy to assist you to choose the best technique, and can provide client-friendly virtual samples and artwork proofs to make it easy.

Reach out to a STORMTECH decoration expert today.

# E) EMBROIDERY

Evolved from artisan handwork to high-speed, multi-head computerized machines, embroidery is a high-density, decorative stitching technique suitable for most fabric types.

At STORMTECH, our expert staff use state-of-the-art digitizing software tools, embroidery machines, and best-inclass threads to apply embroidery on a wide range of apparel, bags and accessories.

Heat Transfer is a technique where logos are digitally printed onto transfer paper. The logo on the heat transfer paper is then transferred onto a substrate using heat and pressure. This high quality, full-colour heat transfer technology allows for high definition detail - including free-standing text - and has superior adhesion and durability.

Screen printing is a technique that involves using a woven mesh screen that supports an ink-blocking stencil. Ink is transferred through the permeable areas of the woven mesh screen onto a substrate to receive the desired image.

Create a premium, luxury look and feel using STORMTECH's faux suede and faux leather patches. Laser etched patches are an ideal decoration technique to showcase and elevate your brand artwork on a wide range of apparel, bags, and accessories.

# STORMTECH CUSTOM DESIGN

Work with our team to execute your custom designed apparel using STORMTECH's leading edge decorating and design techniques. Whether it's a special colour, fabrication, design modification or fully customized product, we have the ability to design and manufacture according to your client's unique requirements.
